FOREWORD

The need for a reference source indicating specialized instruments and equipment available in the National Laboratories has been felt for a long time. Besides providing information on specialized items available in these institutions, it helps universities, industries and Government agencies in seeking assistance direct from the nearest laboratories.

The information has been compiled on the basis of replies received from the laboratories up to November 12, 1964. The limitations of obtaining comprehensive and complete details are well realized. However, it is hoped that users will obtain fuller details from the laboratories when needed.

A handwritten signature in dark ink, appearing to read "Musai Zuber", is written over a horizontal line.
